

Exercitiul 1:

```
import java.util.Scanner;

public class pr1 {

    public static void main (String[] args){

        Scanner sc=new Scanner (System.in);

        int n=sc.nextInt();

        int i=2;

        do {

            System.out.print(i+" ");

            i+=2;

        }while(i<=n);

        sc.close();

    }

}
```

Exercițiul 2:

```
import java.util.Scanner;

public class pr2 {

    public static void main(String[] args) {

        Scanner sc=new Scanner(System.in);

        double n=sc.nextInt();

        double i=1, sum=0;

        do {

            double p=(int) Math.pow( i, 2.0);

            sum=sum+p;

            i++;

        } while (i<=n);

        System.out.println("suma="+sum);

        sc.close();

    }

}
```

Exercițiul 3:

```
import java.util.Scanner;

public class pr3 {

    public static void main (String[] args) {

        int j=0;

        do {

            int i=1;

            j++;

            do{

                System.out.format ("j>=i);

                i++;

            } while(j>=i);

            System.out.println();

        } while(j<5);

    }

}
```
